Magic Ink

Graffiti remover

AGS 8 SK, a graffiti remover specially designed for removal of graffiti based on silver nitrate solution, so called Magic Ink. For indoor and outdoor use.

Magic Ink graffiti is based on Silver nitrate solution. When the graffiti is applied on the surface, it is invisible, but emerges after a while in contact with the UV-light as a dark brown shadow. Conventional graffiti removers does not remove Magic Inc. **AGS 8 SK** is specially developed to remove Magic Inc graffiti.

AGS 8 SK may be used on most surfaces such as, hard surfaces, plastics, porous surfaces, etc.

AGS 8 SK may attack certain metals. It is always recommended to make a small test.

INSTRUCTIONS FOR USE

Mixing AGS 8 SK

AGS 8 SK is delivered as a 2-pack system. A liquid phase and a powder as a thickener. When mixed, the system is stable for approximately 4-7 days. Add while stirring 80 gram of the powder into 920 gram of liquid. A creamy paste should be obtained.

Graffiti removal

To avoid contamination, pour a small amount of **AGS 8 SK** from original container to a plastic bucket.

NB! Do not immerse the brush into the original container. Apply **AGS 8 SK** with a brush. Agitate the surface easily with the brush or a white abrasive sponge. Let dwell for 1-6 hours. To prevent blistering, agitate during dwelling time. For porous surfaces: Jet off with high-pressure water, 70-90°C and pressure depending on the surface. For hard surfaces: Jet off with high-pressure water, 70-90°C and pressure depending on the surface. Use cloth and wipe off at small areas. Rinse with water. Repeat if necessary.

Dosage

Use as concentrate.

Consumption

0,2-0,5 litre/m².

Technical data

- Liquid and powder.
- The liquid is supplied in a 5 litre blue plastic can and the powder in a 1 litre plastic can.
- Specific weight 1,1 kg/litre.
